

Beach - Bush - Birds

Warringah council are assisting.

To restore remnant *Themeda australis* (Kangaroo grass) and the genetic diversity of the Long reef grassland ecosystem. Council is assisting by changing management practices to **STOP MOWING** selected remnant grassland areas within Griffith Park. When mowing is stopped, Reefcare has proved that biodiversity increases.

Warringah Council

WHY DON'T THEY MOW THE GRASS?

IN GRTIFFITH PARK, SOME AREAS OF GRASS ARE TO
BE LEFT UNMOWN, SO THAT REMNANT NATIVE
GRASSES CAN FLOURISH.

IT IS HOPED THAT THIS ACTION WILL IMPROVE THE
ENJOYMENT OF THIS AREA FOR THE WHOLE
COMMUNITY.
